SUMMARY

Computer Science undergraduate specializing in Backend Development, Android Development, AI Systems, and XR technologies. Experienced in building scalable applications using FastAPI, REST APIs, SQLAlchemy, and machine learning workflows. Strong foundation in Data Structures, DBMS, Operating Systems, OOP, debugging, software testing, API development, and Agile software engineering practices.

EXPERIENCE

Android Developer Intern

May 2026 – Present

UE Developer, Remote

- Developing Android applications with focus on debugging, testing, feature enhancement, and performance optimization.
- Collaborating with 3+ developers to identify bugs, improve application stability, and enhance user experience across Android workflows.
- Implementing software testing workflows, resolving 20+ production issues, and contributing to Agile development practices.
- Participating in code reviews, deployment activities, and version control workflows across multiple application modules.

PROJECTS

GenAI Cyber Incident Reporting and Severity Assessment System

Sep 2025 – Oct 2025

Python, FastAPI, REST APIs, SQLite, Machine Learning | [Live Demo](#)

- Engineered an AI-powered security incident management system processing 500+ daily logs, reducing manual triage time by 40%.
- Crafted a log correlation engine achieving 95% threat classification accuracy across multiple cybersecurity incident levels.
- Implemented and deployed 10+ REST API endpoints using FastAPI with response times below 150ms.
- Automated PDF-based incident reporting workflows, reducing manual documentation effort by 40%.
- Implemented secure offline-capable workflows supporting reliable processing of 500+ cybersecurity incident records.

AI-Powered Code Review and Quality Assessment System

Jan 2026 – Mar 2026

FastAPI, SQLite, SQLAlchemy, Python, Jinja2 | [Live Demo](#)

- Architected a static analysis platform scanning 2,000+ lines of code for security vulnerabilities and maintainability issues.
- Engineered a hybrid risk scoring engine evaluating 20+ software security and quality parameters.
- Integrated automated complexity analysis and maintainability scoring across 2,000+ lines of source code.
- Developed relational database models using SQLAlchemy to manage and retrieve 1,000+ code review records efficiently.
- Created a production-ready dashboard supporting real-time analysis and visualization for 1,000+ code review records.

Hybrid Scientific Data Visualization System

Oct 2025 – Dec 2025

Python, Web Applications, Desktop Applications, Data Visualization | [Live Demo](#)

- Developed a hybrid web and desktop application for scientific data visualization and real-time monitoring of chemical equipment parameters.
- Engineered synchronized cross-platform workflows handling 15,000+ real-time data points for anomaly detection and analytical visualization.
- Optimized backend processing and memory management, reducing system memory usage by 60% while maintaining application performance.

TECHNICAL SKILLS

- **Languages:** Python, Java, C++, C#, SQL, JavaScript
- **Backend & Databases:** FastAPI, Flask, REST APIs, SQLAlchemy, SQLite, SQL Server, Microservices
- **Android & Tools:** Android Development, Debugging, Testing, Git, GitHub, Linux, Unity, Photon
- **Machine Learning & Core CS:** Scikit-learn, XGBoost, Data Structures, OOP, DBMS, Operating Systems, Computer Networks

EDUCATION

Vellore Institute of Technology

2023 – 2027

B.Tech Computer Science (Gaming Technology)

CGPA: 8.51 / 10

Sir Padampat Singhanian Education Centre, Kanpur

2022 – 2023

Class XII

78.8%

Army Public School, Chennai

2020 – 2021

Class X

85%

CERTIFICATIONS

- Oracle Cloud Infrastructure – Generative AI Professional
- Google IT Support Professional Certificate
- Introduction to AR/VR/MR/XR Technologies, Applications & Issues – University of Michigan (Coursera)
- Develop Generative AI Applications – IBM
- Unity Certified VR Developer
- NPTEL – Human Computer Interaction (Elite)
